

Eyyu Feyesa

Software Engineering Student — Software Developer

PROFILE

Software Engineering student with a strong interest in software engineering and full-stack web development. Experienced in building web applications, working with databases, and developing gamified learning systems. Passionate about clean code, problem-solving, and continuously learning modern technologies. Seeking a software development internship.

EXPERIENCE

Academic & Personal Projects — Software Developer
Addis Ababa, Ethiopia — 2024 – Present

- Designed and developed web APIs and application features.
- Implemented secure authentication and authorization protocols using JWT.
- Worked with MongoDB for efficient data modeling and persistence.
- Built and tested application modules using Postman to ensure reliability.

PROJECTS

FMBLS — Bible Learning Management System
Gamified Platform — [Live Demo](#)

- Developed a gamified learning management system featuring XP progression and leaderboards.
- Built application logic using Node.js and Express.js.
- Structured MongoDB collections for user management, lessons, and progress tracking.

Task Manager API
Web Application Service

- Built a functional web service for task management with full CRUD functionality.
- Integrated secure user authentication via JWT.
- Utilized MongoDB for persistent data storage.
